

New talent to build the present and future of Viladecans Hospital

Viladecans Hospital is immersed in an important process of change. In a short time, we will grow. The new Hospital will have new facilities that will allow us to carry out new proposals –organizational, of service and technological– and we need to continue having the best professionals to keep on offering the best health services to the citizens of our area of influence.

The future Viladecans Hospital will be larger and more modern, and will be better adapted to the current health needs of the population, but it will surely preserve the dynamism and courage that has always characterized it. We have already laid the foundations of the new Hospital and now we are building the team that will star in the future of our centre. Would you join us?

We know that the most important of any organization are the people who work in it. And this is even more evident in our Hospital, which is oriented to action and to solve increasingly frequent care challenges.

People, with their knowledge, skills and abilities, are the ones who can help us to achieve these challenges.

700 restless, highly qualified and service minded people work in Viladecans Hospital. The dimensions of the centre favour the proximity to the population it serves and the incorporation of innovations that allow improving the attention to citizens. In this sense,

Viladecans Hospital has been a pioneer in the incorporation of primary ambulatory surgery, programs of coordination with primary care, structured triage and advanced triage in the Emergency Department, virtual anaesthesia consultation, and sedoanesthesia in diagnostic and therapeutic procedures, among other advances.

The good job performed by our professionals has been recognized with numerous awards: the TOP 20, in several categories (global hospital management in 2015, 2016 and 2018 and musculoskeletal area, in 2018); the awards of the Health and Social Consortium of Catalonia, 2018 and 2019, and several distinctions of the Best Spanish Hospital Awards (BSH), in the areas of gynaecology, urology and global clinical results in 2019.

But, above these awards, granted by these entities of the health sector, we especially appreciate the good evaluations made by patients in surveys about the treatment received from our professionals.

At Viladecans Hospital, we have technical and scientific knowledge, and skills that stand us out as a high performance organisation, close, innovative, and cohesive, that encourages participation and networking.

If you recognize yourself with this profile and work in this environment, get in touch with us. Although we do not have an open call we would like to talk to you.

Do you want to work with us?
